Forecast for Saturday 15 May 2021

Weather: Cloud thickening and descending onto high slopes during the early hours. Outbreaks of rain and drizzle likely by dawn. Cloud then lifting early to mid-morning with rain easing. Some brighter spells likely, with the odd glimpse of warm sunshine. However showers then follow later in the morning and through the afternoon. These turning heavy at times, with an outside chance of hail and thunder. Showers easing again during the evening, but staying cloudy.

Chance of cloud free mountain/hill tops above 600m: 20% at first, increasing to 70% by the afternoon. Falling to 40% after dusk

Visibility: Poor at times in early morning rain and drizzle, with cloud obscuring views above 500m and occasionally as low as 300m. This lifting through the day, although areas of cloud still likely at 600m by midday, mainly during any showers. Away from showers, some good views of distant hills likely, but occasional reductions to poor are to be expected as any showers develop and move through. Becoming poor at height again during the evening as cloud returns from the east, to hills above 400.

Meteorologist's View

Away from showers, some fine conditions are possible. However, any showers that do occur have the potential to give poor conditions for a time, with heavy rain. Some hail and thunder cannot be ruled out. Waterproof layers will be essential. Still feeling a little chilly at times, especially once caught in any of those showers.

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Fri 14 May 2021	0mm	5mm	16.8mm

Forecast for Sunday 16 May 2021

Weather: A few showers continuing overnight, but these mostly light. Another day of brighter or sunny spells, and occasional showers then follows. Showers could be heavy again, with thunder and hail possible. Where showers occur, they could be slow moving, bringing some very poor conditions. Showers easing during the evening.

Maximum wind: Easterly 10-15mph.

Chance of cloud free mountain/hill tops above 600m: 40% overnight. Increasing to 80% during the morning.

Visibility: Very good views, away from showers. This falling to poor in any rain, especially any heavier bursts, with cloud obscuring hills above 500m overnight and at times during showers.

Temperature: **Valleys:** Plus 5 Celsius becoming Plus 11 Celsius
At 600m: Plus 3 Celsius becoming Plus 7 Celsius
Freezing level: Above the summits.
